

INTERIOR STONE

SecondStone™
Reclaimed Granite Products

Solid granite tile &
interior stone made from
100% reclaimed material

Our Story

SecondStone is a locally owned Northwest company that manufactures tile, landscaping pavers and interior/exterior stone from reclaimed granite. We are committed to delivering beautiful, durable products while ensuring environmental responsibility & sustainability.

Reclaimed Granite

A typical granite installation results in roughly 30% waste material. At 15 to 22 pounds per square foot, this translates into thousands of tons of waste material in landfill each year. SecondStone collects this waste material from local stone fabricators and uses a patented process to create solid granite tile and pavers. Any resulting waste material is recycled to produce decorative gravel and aggregate - with zero waste and nothing going into landfill.

Our goal is to keep more than one million pounds of waste material out of our local landfills each year.

Beautiful. Natural. Sustainable.

Applications

- Backsplashes
- Floors
- Shower surrounds
- Walls
- Fireplaces
- Columns

The Chisel shape (below) can be compared to stacked stone and offers dimension and texture. Use it to add a unique look to walls, fireplaces, columns, or as striking accent to virtually any area.

Chisel

Custom	Create your own shape

Options

Colors

- Light Blend
- Dark Blend
- Mosaic

Thicknesses

- 3cm (~1.25")
- 2cm (~0.75")

Never before has granite tile been available in such a wide array of shapes and sizes. The rough edges, unique shapes and color variations give SecondStone Tile a rustic yet contemporary look. Made from *solid* granite (not crushed and reconstituted), they are extremely durable and are available in three standard color choices: "Light Blend", "Dark Blend" and "Mosaic". Custom colors requests are based on availability.

Feel good about your choice knowing that for every 100 square feet of SecondStone tile you install, you will be keeping more than 1,500 pounds of waste material out of your local landfill.
